

COMBINED MUSICAL CLUBS ANNOUNCE RETURN OF THE FALL CONCERT AND DANCE

DECISION IS MADE IN ANSWER TO PLEA BY PROF. ROGERS

November 6 Is Chosen as Date
Of First Autumn Affair
In Many Years

PRICE REDUCTION MADE

Renewing an old policy, in disuse for a number of years, the Combined Musical Clubs will give a fall concert and dance on November 6, in the main hall of Walker Memorial. This decision comes from the general management of the Clubs in answer to Professor Robert E. Rogers' plea, made at the All-Technology Smoker, for a closer affiliation between the Institute and students in recreational activities.

It is hoped by the sponsors of the concert that it will call to the attention of the student body the existence of the Musical Clubs early in the year and thus encourage better support from the students. As a step in the direction pointed out by Professor Rogers, the re-institution of the fall concert, which was formerly an annual affair, is expected to bring the students closer to Technology in seeking their recreation.

Every Effort Will Be Made To Put Over The Concert

Nothing will be left undone and nothing overlooked by the managers of the concert in an effort to make a success of it and to leave a record which will warrant its continuation in future years. All four members of the combined group, the Glee Club, the Instrumental Club, the Banjo Club, and the Technicians, the dance orchestra, will offer programs.

Representatives of the musical organizations at Wellesley College, Wheaton College, Salem Normal School, and Framingham Normal School will be present at the concert to judge for themselves whether their respective groups could arrange combined concerts with the Technology clubs. In this way the Clubs hope to be able to make dates with the different colleges for joint recitals later in the year.

Decrease In Admission Price

In line with the aim of making this concert the best in years, the price of admission has been reduced to \$2.50 per couple. By comparison with the former charge of \$4 a couple, tickets this year will be much easier on the undergraduate pocketbook.

Friday, November 6, has been chosen as the date for the concert; Main Hall, Walker Memorial, the place, and 8.30 o'clock the hour. Following the concert, there will be dancing from 10.30 to 1 o'clock, tickets to the recital entitling the holder to dancing privileges.

(Continued on Page Four)

New Men Show No Class Spirit As Few at Rally

Sophomores Contemplate Easy
Victory with Freshmen
Still in Lethargy

Disappointed in the meagre number of freshmen present, Robert G. MacKay '33, president of the Junior Class, spent the few minutes of the freshman rally yesterday afternoon by exhorting those present to urge as many of their fellow classmates as possible to attend the next and final rally before Field Day. This rally will take place next Wednesday; the room and time will be announced in a later issue of THE TECH. It is very important that all freshmen attend this meeting that they may learn the Field Day plans of their class and the official rules covering student activity on that day.

NAVAL MUSEUM GETS FAMOUS SHIP MODELS

Many New Prints Added Those
of the Clipper Era

Among additions to the Naval Architecture Museum during the summer is a new ship model, built by Professor Jack. The model has been lent to the museum by Mrs. Jack. It is a replica of the "Sarah Constant," which was fitted out by His Majesty's Council for the first colony of Virginia. The "Sarah Constant," accompanied by the ships "Goodspeed" and "Discovery," carried, besides her regular crew, one hundred men to form the first colony of Virginia.

There are also several new displays, one of which includes forty-two shipping cards of San Francisco and Australian clipper ships of 1850 and 1860. Two other sheets have eighty-two house flags in color and the names of over two hundred whaling vessels. These were published in New Bedford by Charles Taber in 1834, and form a part of the Clark Collection.

All the books of the Clark Collection have been rebound. This legacy to the museum was left by Capt. Arthur Clark, and form an interesting history of the sea and "those that go down to the sea in ships." Besides the books, there are over twenty-five hundred prints in the collection.

DORM DANCE TO END FIELD DAY STRUGGLE

Friday night, following the strife between the lower classes, the Dorm men will spend the evening dancing to the tunes of the Technicians. The dance will be held in the Main Hall of Walker Memorial and will last from 9 till 1 o'clock. Tickets may be obtained from the Dorm office or from any members of the dance committee for one dollar and fifty cents.

Those who remember last year's poverty party or crazy color dance, at which the Fox Movietone News came to Walker and took "shots" of the proceedings, will not miss this dance, for although there will be nothing unusual about the costumes or decorations, there will be plenty of fun.

COURSE XVII TO HOLD MEETING THIS NOON

Students and Faculty members of Course XVII will meet at a dinner to be held at the Riverbank Court today at noon. Professor Frederick K. Morris will speak and the possibility of forming a student branch of the Associated General Contractors will be discussed.

TECH HARRIERS TO MEET HOLY CROSS ON FRANKLIN FIELD

Gilman and Kearns Should Give
Good Individual Battle
For First

TEAM EVENLY BALANCED

Holy Cross freshman and varsity cross-country teams will meet the Institute harriers this afternoon, on Franklin Field. Both teams are in the best shape of the season, and they should give a race well worth following every yard of the five-mile course.

Last week at Harvard, Kearns beat Don Gilman, ranking twelfth to Gilman's fourteenth, so there is a bit of private competition going to take place during the race, which will be of great aid to the Technology score. Their efforts, one to keep his reputation, and another, to establish his, will materially cut down their time for the run.

Freshmen Elect Captain

After last week's meet at Harvard, the freshman team gathered and elected as captain of their team John S. Holby, formerly of Mamaroneck High School and Avon Prep. Holby was the first Tech man to finish in the freshman race, and has been among the most promising of the men reporting at the track house for the freshman team.

Coach Hedlund is pleased particularly with the excellent grouping of the varsity team as they finished in the Harvard-Dartmouth race. The men finished in twelfth, fourteenth, sixteenth, eighteenth, and twentieth positions respectively. This speaks well for the collective talent of the team, as it is led by men such as Kearns, Gilman, Barrett, and Hall of last year's freshman team, and everyone of these men will stay right with the best that most teams have to offer.

Relay trials have been going on at the track, with several teams of candidates out for each class. There are twelve men on each team, so the competition is strong, for places. Yesterday afternoon was the first day of the trials, and they will be continued tomorrow. On account of the cross-country meets today, there will be none given.

RADIO SOCIETY WILL START WORK TODAY

Mr. Gager to Talk on Work
for Coming Year

Mr. Frank M. Gager of the Communications Laboratories will speak on the history and purposes of the M.I.T. Radio Society and plans for the coming year will be discussed at the first meeting of the organization which will be held today at 5 o'clock in Room 10-275. Now that most of the construction work on the new station has been completed, it is expected that more attention will be directed to other phases of club activity.

After Mr. Gager's talk, new members

"Face on Barroom Floor" Rediscovered in Walker

In spite of the fact that the famous ballad, "The Face On The Bar-room Floor," was composed many years before our own Walker Memorial rose above the ground, the popular ditty might have taken its title from a little-noticed reproduction now residing in that very building. Near the right-hand column in the first-floor lobby as one enters through the main doors, is the face of an old lady etched by Nature into one of the blocks of marble which form the floor of the lobby. The black veins running through the marble have in this case combined to portray the features of an old witch-like lady with a prominent chin, a hooked nose, and a stern expression. Although the figure is only about six inches in length, it can be quite easily located by anyone who has had it pointed out to him.

MANY NOTABLES ATTEND IMPRESSIVE SERVICE FOR DR. STRATTON AT CHURCH

Local Scabbard and Blade Society To Hold Smoker

All Advance R.O.T.C. Members
And Sophomore Officers
Are Invited

The Technology chapter of the Scabbard and Blade Society will hold a smoker in the Grill Room at Walker next Tuesday evening, October 27, at 8 o'clock. Major Rufus C. Maddux, of the Chemical Engineering Service, will address those present. All advance R.O.T.C. men and Sophomore non-commissioned officers are invited to attend.

Next Tuesday has been proclaimed National Scabbard and Blade Day and will be observed by all the chapters to commemorate the birth of former President

(Continued on Page Four)

PROF. SCHELL SPEAKS TO ECONOMIC SOCIETY

Declares Accounting Increasing
Greatly In Importance

Professor H. Schell '12, Head of the department of Business and Engineering Administration, was the guest speaker at the October meeting of the Boston Chapter of the National Association of Cost Accountants. Professor Wyman P. Fiske, also of the Course XV staff, and Vice-President of the Association, was chairman of this month's meeting.

To develop a better understanding of the true nature and value of accounting in industry; to improve technical methods and to establish sound general principles, and to supply its members with information on the most up-to-date methods and assist them in solving their individual problems are the objects of the Society. To carry them out the Boston Chapter has, each month, lecturers of note speak on their various specialties.

Three Problems Face Management

"Three problems face industrial management," said Professor Schell, "One stands before every manufacturer; another confronts the business of each nation; the third challenges the industrial world. The manufacturer knows," he continued, "that his product soon must be distributed as precisely, as effectively, and as economically, as they are produced if he is to surmount competition. The industrial nation knows that it must find an effective counterpart to Russian technique, if it is to prosper. The World knows that it must lessen the violence of economic swings, if the institutions are to advance."

Professor Schell went on to say that these problems will yield only to science, and that the work of the accountant is gradually becoming more important in this work, expressing the view that twenty years hence, all great leaders will be fully versed in the language of the accountant.

FIELD DAY CREWS TO RACE IN LAPSTREAKS

This year the Field Day crew race between freshmen and Sophomores will be rowed in lapstreak barges instead of in regulation shells. On previous Field Days it was customary for the two crews to use the lighter boats; but this time they will race in the ones in which they learned the rudiments of the art of rowing.

At the decision of the coaches, both the yearlings and the Sophomores went back to the heavier boats in the practice held yesterday morning. Up until that time the older crew had been practising in racing shells, while the new men had only been in boats of this class for a few days.

MEMORIAL MEETING FOR FACULTY HELD AT NOON IN 10-250

President Compton and Professor
Prescott Pay Tribute to
Late Physicist

HOOVERS SEND WREATH

Technology suspended its varied activities last Wednesday morning and paused to pay last tribute to its dead leader and friend, Dr. Samuel W. Stratton, for seven years president of the Institute and since 1930, Chairman of the Board.

Hundreds of Technology students joined the throng of leaders in all walks of life who attended the funeral services at Trinity Church. Banks of floral tributes from all over the country filled the church and a wreath from President and Mrs. Hoover, who had long been friends of Dr. Stratton, lay near the casket.

Memorial Service

At noon a memorial service for the Faculty was conducted in Room 10-250 with Professor Frederick S. Woods, chairman of the Faculty, presiding. President Karl T. Compton, and Professor Samuel C. Prescott paid tribute to the late president.

President Compton said in part: "This occasion brings vividly to my mind, by contrast, an occasion at which most of you were present, about eighteen months ago in this room, when Dr. Stratton introduced me to you as his new colleague. Little did we then think that I would, in the same spot, so soon reply to his welcome of me by expressing my farewell to him. Throughout this brief interval he has encouraged me, advised me, given me support and freedom of action, yet without violating his own unflinching sense of what should be done. I wish to bear tribute to his greatness and fundamental kindness of character."

Praises Dr. Stratton

President Compton then mentioned three distinguished characteristics of Dr. Stratton, his unassuming and generous spirit, his complete absorption in his work and plans, and the consistency of his life and thought.

He continued: "I doubt if any of us has ever known a man whose whole life has been so consistent, straightforward and unswerving in its devotion to a particular form of public service and which has been carried on with such complete elimination of self-interest. We mark today the passing of a great man. At the same time we recognize the lasting importance of those things which were the mainspring of his life, and we are happy that our position as his colleagues gives us the opportunity to 'carry on.'"

Personal Tribute

"In conclusion, I want to add this very personal tribute. Having always respected and admired Dr. Stratton for his accomplishments and because of what I knew to be the feelings toward him on the part

(Continued on Page Four)

A. I. E. E. Student Branch To Hold Supper Meeting

General R. I. Rees, Assistant Vice-President of the American Telephone and Telegraph Company, will address all freshmen and Sophomores interested in Electrical Engineering, at a supper meeting of the Student Branch, A. I. E. E. The subject of his talk will be "The Relation of Engineering Education to Industrial Careers." The meeting, sponsored by the department of Electrical Engineering, will be held today at 5.15 o'clock in Room 10-250. Following the address a free supper will be served at Walker.

New Benches in Labs Are For Study Exclusively

Those students who have been using the study benches recently installed in the Steam and Testing Materials Laboratory for smoking while reading the current comic strip will soon become aware of small, blue-printed signs, requesting that they refrain from the former practice. These signs have been placed to have our corridors create a better impression upon the casual outsider, who may be led to believe that those are typical Technology study scenes.

Recently, other benches at which smoking is permitted, have been placed in less conspicuous places than those just mentioned. These are in Room 3-250, and in the basement of Building 5, to which all ardent puffers of the weed are requested to retire.

OVERFLOW

BULLETIN boards have ever served a useful purpose in the efficient functioning of student affairs, so useful, in fact, that the Institute Committee long ago saw fit to provide for their constant and proper upkeep. The Walker Memorial Committee now has complete supervision of these bulletin boards, with the authority to remove and destroy what it pleases to assure the best appearances, and with the obligation to keep the boards fully up-to-date. Apparently, the committee has been unaware of these privileges.

To be sure, the Walker Memorial Committee has a surfeit of other duties which necessarily occupy most of its time. In addition, it was further handicapped this year in that only one of the Junior members returned to school. Consequently, the remainder of the committee has been forced to spend all of its time signing up the facilities of Walker for the rest of the school year, and has neglected its lesser duties. Recently a competition has been opened for new members, and to initiate the new men we suggest that the next matter to come before the committee be an investigation of, or preferably, some concerted action on "the bulletin board situation."

Such a grievance does indeed seem trifling, but in light of the benefit to the general cleanliness of the corridors, the plea is highly in order. The majority of bulletin boards are completely filled; even the adjoining walls bearing a share of the burden. The Walker Memorial Committee is at fault, and it seems high time that the matter receive prompt attention.

A USELESS GESTURE

NOW that the freshman section leaders have been elected and the date set for Field Day draws near, it is time for the annual seige of kidnappings and abductions to break forth with all its usual fury. Sophomore leaders will mysteriously disappear in strict accordance with plans well-known to everyone far in advance of the actual dropping from sight. Prominent freshmen who are known to be enthusiastic supporters of their cause will fail to appear for regular classes, but no one will be in the least surprised. The surprise would be for them to show up.

Somehow this regular recurrence of kidnappings has lost its glamour. Supposedly they are carried on to build up enthusiasm within the classes. By stealing away some member of the opposition one class hopes to weaken its opponents and at the same time to strengthen its own position by raising hopes and getting its members excited. Whether the desired ends are obtained is a matter of some doubt, especially when the plans for the kidnapping are known almost as well to the kidnappee as they are to the kidnapers.

The only other point in continuing this old, and should we say honorable, sport is that it draws the attention of the classes to the men taking part in the abduction. Whether the publicity so obtained is of value to the men involved is hardly to be doubted when the first-year men come to the Institute knowing nothing of the capacities of their classmates. An active part in the planning and execution of a kidnapping, especially when it is successful, draws the notice of the students, and probably brings its rewards in positions to which the participants are elected in the following class elections. This is more true in the freshmen than in the Sophomore class where the men have had a full year in which to become acquainted.

If kidnappings are planned for the purpose of raising class enthusiasm, they fall short of their objectives, for they affect only a very few. Class rallies would be far more effective. If they are deliberately planned to attract attention to the participants, they fall into the class of cheap politics. For arousing class enthusiasm kidnappings are of little value; for political purposes they are objectionable. Such futile gestures should be eliminated.

DEMOCRACY INVADING AMERICAN COLLEGES

Women Demand Equal Rights And Must Pay for Them

True democracy is now invading the American college campus, but in a strange way. Women have long demanded equal rights with men, and now they must pay for them—that is, on the campus of the University of Arizona. A Bachelor's Club has been formed at that institution for the purpose of conducting a drive to make its coeds share the expenses of their all-necessary dates in order to bear through the depression together.

It is estimated that the average college girl has more money to spend than the male. It seems that the "great American date" at Arizona may lose much of its color if this plan is not adopted and the man in the case relieved of some of the financial responsibility. Arizona is not the only school to attempt to liquidate the "frozen date asset," for the divided payment plan is in vogue at Annapolis, West Point, University of Pittsburgh and elsewhere.

It pays to look over the wall

The industry that succeeds today is the one that looks outside its own "back-yard" for ways to make itself more valuable.

For many years, Bell System men have been working out ideas to increase the use and usefulness of the telephone. For example, they prepared plans for selling by telephone which helped an insurance man to increase his annual

business from \$1,000,000 to \$5,500,000—a wholesale grocer to enlarge his volume 25% at a big saving in overhead—a soap salesman to sell \$6000 worth of goods in one afternoon at a selling cost of less than 1%!

This spirit of cooperation is one reason why the Bell System enjoys so important a place in American business.

BELL SYSTEM

A NATION-WIDE SYSTEM OF INTER-CONNECTING TELEPHONES

Engineer Finds Critical Angle of Walker Chair

Smash! Thumpity-Bump! Smash! Thumpity-Bump! Bang! Always on the pursuit of scientific knowledge, one of Technology's budding engineers went perhaps a bit too far in his seeking for the critical angle at which a Walker Dining Room chair could be tilted back without capsizing. He found the angle quite to his satisfaction, even though it did result in the force of gravity dragging him to the rather solid floor of the Main Dining Room at what no doubt seemed to him to be considerably in excess of the old thirty-two feet per. As a result of his research it can be assured that every patron of the Dining Room will know just how far he can lean back without disaster and just how quick he can come to a stop should the inevitable happen.

Stepping Out?

YEARLINGS RIP UP ELIOT HALL GRID SQUAD; SCORE 19-0

Lovering Elected Captain of Team, After Starring All Through Game

TEAM FUNCTIONS WELL

Eliot Hall of the Harvard Dormitories took a severe 19-0 beating from the Technology freshman grid team yesterday afternoon at the Soldier's Field. Frank Lovering was the star of the game, playing left tackle, and was elected captain of the team, after the game, in the locker rooms.

Until the first half of the game, there was no scoring, as neither team was pulling as a unit, and fumbles were much too common. At almost no time was either team within a sure scoring distance, and both seemed to be feeling out the other at the same time, trying to get its own bearings.

Second Half

With the kickoff of the second half, the Engineers seemed to gain new strength, and each play was run off with precision which made the men begin to look like a team. Following a long drive down the field comprised mostly of line bucks, Farmer, one of the yearling backs, took the ball five yards through the center of the line for a score. The ball was brought into scoring range by Sieminski, the diminutive brother of the Sophomore quarterback.

Trying for the point on a line plunge, the team's efforts were for naught against the determined Harvard men. Again the ball was put into play, and in a short time was replaced in the possession of the freshmen.

Second Tally

Encouraged by their lead, and determined to add to it, they carried the ball back down the field, in a well-played drive unmarred by the fumbles and incomplete passes which made the first half unimpressive. At the thirty-five yard line, Prestwich, right halfback, carried the ball around left end, and eluding all tacklers dove across the line for the second tally. Again the point was attempted, and again vainly.

Playing more easily, as the score piled up in their favor, the first-year men tried all the tricks in the bag, and obtained a great deal of good practice. The third touchdown was made by Pomeroy after carrying the ball twenty yards around the end. Point was kicked.

Twenty-Five Men Present

There were about twenty-five men present for the game, and each man was given a chance to play. Coach Worcester attempted to try out the relative merits of the candidates, and shifted the men around as much as possible.

The starting lineup was as follows: center, Groiaza; r.g., Hunt; l.g., Fletcher; r.t., Kennedy; l.t., Lovering; r.e., Reed; l.e., Brosnahan; q., Sieminski; l.h., Peterson; r.h., Prestwich; f.b., Cooper. Practice will be held as usual during the week before Field Day.

NEW STUDENTS MEET TO DO BOY'S WORK

Boston Settlement Houses are Described to New Men

At a meeting yesterday evening of the students interested in doing boy's work, Mr. W. Duncan Russell described the nature of the work done by this branch of the Technology Christian Association, and outlined the advantages to be gained by participating in it.

He spoke of the 43 settlement houses located in Greater Boston and of their value to the 25,000 boys in the poorer sections of the city. There is a need for a large number of men to act as leaders in this work, he said, and volunteer workers are especially desirable.

Another Meeting of T.C.A.

Since all of the new students interested in the work did not appear at the meeting, Mr. Russell will be at Technology again next week to meet those who would like to see him about the boys' work.

Students at Emory College, where the Coca-Cola factory is located, certainly believe in patronizing local products. Last year they spent \$16,260 for the popular drink. Every Emory student drinks eight-tenths of a glass of Coca-Cola every day.

The College of the City of New York offers a course in Aramaic.

TECHNOLOGY DAMES HEAR PRES. COMPTON

At the first regular tea of the Technology Dames held last Monday afternoon, Pres. Karl T. Compton spoke on the life of the late Dr. Samuel W. Stratton. He paid high tribute to the way in which Dr. Stratton had given full credit to the young men working under him for the development of his ideas.

The Dames is an organization consisting of the wives, mothers, and sisters of all registered students, research workers and resident Alumni. Meetings are held in the Emma Rogers Room on the third floor of Building 10 every first and third Monday of each month. Everyone who is eligible is cordially invited to attend.

MENORAH OUTLINES PROGRAM FOR YEAR

Professor William M. Hall was elected an honorary member of the Technology Menorah Society at the smoker held last Wednesday night at Walker. He was the speaker of the evening and his talk was well received by the large number present.

Benjamin F. Olken '33 outlined the program for the year. This includes two combined meetings and dances with women's colleges, an open forum led by a prominent speaker, two informal dances, and a formal dance to climax the year.

The Crimson and White of the University of Alabama relates the following ironic situation. A certain student received his grades for work done in the quarter. He rated 13 B's and one F. The sole failure was in a course entitled "How to Study," given by the psychology department.

Brown and Dean Academy Put on Twin Soccer Bill

Varsity Soccer Team Will Meet Brown and Freshmen Will Play Dean Academy

After being beaten by adverse weather conditions at Dartmouth last week, the varsity is pointing for its first win of the season when it goes up against Brown in the first half of tomorrow's double-header on Coop Field. Brown has been beaten this year by Springfield College, about 5-2. This puts the Providence team in somewhat the same position as the Tech varsity. There should be plenty of hard, fast playing in tomorrow's game, as a victory will mean much to either team.

Dean Academy's team will be seen in action against the freshmen on the second half of the bill at the Coop Field. The freshmen's victory over Watertown High last week made up for their loss at the hands of the New England Schoolboy Champions, Quincy High, in their first game of the season. Their forward line, which has been the weakest part of the team because of its poor offense, showed remarkable improvement in a practice game Thursday evening. It scored six goals against the varsity backs and the goalie. This improvement is due to the addition of a few more experienced men to the squad.

The first game starts at 1.30, the second at 3 o'clock.

Seventy per cent of the freshman class at Wesleyan University were pledged to fraternities at the end of the present rushing season.

7.30 p.m. — M.I.T. Chemical Society meeting in Faculty Dining Room.

MANY PRESENT AT STRATTON FUNERAL

Impressive Rites Are Held Wednesday Morning

(Continued from Page One)

of his colleagues, I have come, during the past year and a half of close acquaintance, to love him, almost as a father. I have had the opportunity to go behind his reserve and make some contact with his rich and affectionate spirit which to know was to love."

Professor Prescott said: "The occasion which brings us together today is indeed a sad one, a time in which our feelings of deep sorrow and personal loss to Technology are closely interwoven. A great man and a great friend has been taken from us. This is not the time nor an appropriate occasion to attempt to give any evaluation of what Dr. Stratton's remarkable life has meant to the sciences of which he was so conspicuous an exponent, or to the Institute which he so faithfully and loyally served. We are still too near to the event which has wounded us so grievously, still too stricken and benumbed by the suddenness and shock of his passing from his wonted place among us, to be able to speak calmly of his many useful services here and elsewhere.

Devotion for School

"We can only in faltering words and heavy hearts, pay tribute to his great character as a man, to his loyalty and steadfastness as a friend, to his intense devotion to the school he loved and for which he zealously labored, and to his constant efforts to help his fellow men."

In another part of his eulogy, Professor Prescott said: "Few of us, if any, can ever know fully how greatly he loved young men, nor how many of them, whether among our own students or elsewhere, he aided by his fatherly counsel and by his efforts, often in hidden yet effective ways, for their welfare and happiness. In these ministrations as in other matters, his extreme modesty and dislike of anything savoring of personal publicity prevented any widespread knowledge of his many generous actions."

Conclusion

He concluded, "Now he is gone from us — whether in far realms of space his great steadfast spirit finds new spheres of useful service, or whether here in this room his unseen presence urges us today to carry on the great work he loved and in which we all were proud to share, we cannot know. This we know, that while life shall last and human affections and honor for noble and manly character shall survive in us, we shall hold him in deep and loving remembrance as a great servant of his people, a great leader and a great friend. What more fitting epitaph could be his than the last complete sentence to fall from his lips as he spoke of another. His life and his accomplishments have been, and will be for many generations to come, the inspirations of youth."

MUSICAL CLUBS PLAN CONCERT AND DANCE

(Continued from Page One)

Music for the dancing is to be furnished by the Techtonians, the undergraduate orchestra, so well known to students of former years at Technology. The personnel of the orchestra has remained unchanged since last year, which means music of the best for the affair. Further announcement concerning the program and the final arrangements will be made in THE TECH in the near future.

stantly since it was founded twenty-six years ago until it now has seventy-eight chapters and a membership of 18,000.

Regular Officers Present

One purpose of the smoker is to bring together the members of the various units in an atmosphere of congeniality which does not exist on the drill field. Many of the regular officers detailed at Technology will be present, giving the R.O.T.C. men an opportunity to meet their superiors informally.

RADIO SOCIETY WILL START WORK TODAY

KEEP KISSABLE

WITH OLD GOLDS

The twenty cigarettes in your package of OLD GOLDS reach you in prime condition, as fresh as twenty cherries just picked from the tree. The finest of moisture-proof Cellophane wrapping insures that.

But OLD GOLDS are not merely fresh; they are refreshingly different. Blended from pure tobacco . . . free of oily, foreign flavorings . . . OLD GOLDS do not taint the breath with lingering odors, and do not discolor the teeth with needless stains.

To be in good taste, as well as for their good taste . . . smoke natural-flavored OLD GOLDS. They'll give you a finer smoke, without any unpleasant after-maths of any kind.

NO "ARTIFICIAL FLAVORS" TO TAINT THE BREATH OR STAIN THE TEETH . . . NOT A COUGH IN A CARLOAD
